Module tutors are leading researchers and practitioners at UCL Medical School and include:
Dr Ann Griffin, Ceri Butler
and Dr Paul McGovern

Bursaries are available towards the cost of fees (subject to eligibility criteria).

This innovative distance learning module, designed and delivered in conjunction with UCL Medical School, will explore questions that include:

- What are the scope, role and academic responsibilities of clinical and educational supervision?
- What are the main theories of supervision and how can these be applied to your practice as an educator?
- What are the current approaches to assessing learning in clinical practice?
- How can you support and monitor educational progress?
- How can you manage trainee progression including trainees in difficulty?
- How might you enhance learning through the use of assessments including workplace based assessments, supervision and feedback?
- What is needed to facilitate learners to identify and address learning needs, improve reflective practice and safely develop clinical expertise?
